Turing at a Glance

Turing makes the documented reliability of security and field-staffing companies visible; corporate organizers pick you on evidence, not from a price list.

THREE CORE VALUES FOR YOU

- 01 Documented trust**
Licenses and certificates are verified on your profile.
- 02 lear rosters**
Headcount and role types are set in the request; changes are confirmed in writing.
- 03 Season foresight**
Request flow shows festival season in advance; rosters are planned on demand.

What is Turing?

Turing is a B2B marketplace that brings event organizers and service providers together on a single platform. Requests, offers and digital contracts move through one flow; every step of the process is on record.

Payment and collection status is monitored through the financial tracking screen in the app. Service fees are settled between the parties under their own agreed terms — Turing does not act as an intermediary for these payments.

TRANSPARENT REVENUE MODEL

Turing earns revenue from only two sources: a tiered commission from organizers per completed transaction (15% down to 5%) and an optional subscription for service providers (Free / PRO / PREMIUM). There are no hidden fees of any kind.

END-TO-END SUPPLY ACROSS SIX CATEGORIES

- 01 Artist & Booking**
Artist access through managers and booking agencies
- 02 Technical Production**
Sound, lighting, stage and LED systems
- 03 Venues**
Concert halls, open-air spaces, hotels, studios
- 04 Accommodation**
Group accommodation for artists and crews
- 05 Transport**
VIP transfers, crew transport, equipment logistics
- 06 Operations**
Security, front-of-house and field staff

Real Problems from the Field

This file starts from your agenda: on the left, a problem the industry faces every day; on the right, its counterpart on Turing.

PROBLEM	WITH TURING
1 Demand swings between extremes: rosters can't keep up in festival season, crews sit idle in winter. There is no predictable work flow.	City- and date-based request flow lets you see ahead: you spot the season's busy dates early and build your roster plan on incoming requests.
2 Organizers lump you together with undocumented, informal crews; you end up defending quality on price.	Your licenses and certificates live on your profile, your past work in reviews. Corporate organizers looking for documented crews pick you on evidence, not on a price list.
3 Shifts, role distribution and headcount keep changing until the last day; there is a real risk of arriving on site under- or over-staffed.	Headcount and role type are clear in the request; changes are confirmed in writing in a recorded flow and the final roster plan is in the digital contract.
4 On per-person jobs, progress payments and collections are tracked by hand.	You follow payment and collection status per job on the financial tracking screen in the app; payment terms are written in your contract and settled between the parties.

Example flow: a 60-person roster for a 5,000-person festival

The steps follow the real platform flow; names are illustrative.

- 1 A festival organizer opens a "40 security + 12 hosts + 8 medical staff, 2 days" request on Turing; the shift plan is in the request.
- 2 The request lands with your documented company; your profile with roster capacity and certificates builds trust from the start.
- 3 You send a per-person priced, shift-planned offer with a template.
- 4 The contract is signed digitally; a 10-person reinforcement added three days before the festival is settled in writing in the same flow.
- 5 Two days of smooth field operations turn into a review; you become the first company called for the region's next big event.

What Does Turing Offer You?

In operations services, scale and reliability are everything. Organizers look for verified, referenced crews; your Turing profile is that verification.

01 Crew and roster showcase

Present your staffing capacity, specialties (security, host/hostess, waitstaff, riggers, medical) and documents on your profile.

03 Roster-based offers

Send per-person or package-priced offers with templates; pin down shifts and role distribution in the contract.

05 Season-long continuity

The same organizers look for staff again and again during festival season; your review history makes you the first crew they call.

07 Written confirmation of changes

Headcount and role distribution changes are settled in a recorded flow; the risk of showing up under- or over-staffed disappears.

02 Event-based staffing requests

Requests with clear headcount, role types and dates are forwarded to you; planning the roster gets easier.

04 Documented trust

Your licenses and certificates are verified on your profile; roster and shift plans are recorded clearly in the digital contract.

06 Season and roster forecasting

City- and date-based request flow shows festival season in advance; you build roster and shift plans on incoming demand.

How It Works

01

Create your company profile

Add your roster capacity, role types and documents.

02

See the requests

Staffing requests from events in your region arrive as notifications.

03

Send your roster offer

Deliver an offer with headcount and duty plan.

04

Make the difference on site

Smooth operations become reviews; reviews become new work.

- Dedicated account manager, 1-hour support

Frequently Asked Questions

Q. Can I join as an individual freelancer?

A. Profiles in the operations category are company-based; individual professionals can join a company as an invited team member. See our Team Members page for details.

Q. How does progress payment and collection tracking work?

A. Payment terms are written in your offer and the digital contract; you follow collection status per job on the financial tracking screen in the app. Payments are settled between you and the organizer; Turing does not act as an intermediary.

Q. Is a license required for security services?

A. Yes; companies providing private security are expected to present their documents under Law No. 5188 on their profiles.

Q. What happens if a roster change comes at the last minute?

A. Reinforcement or reduction requests are confirmed in writing within the same recorded flow; the final roster plan is written into your contract and both sides see the same plan.

Free Professional Tools

7 free tools at turingtr.com/en/tools, no sign-up required: budget calculator, event checklist, cost comparison, technical rider builder, stage planner, academic calendar and demand map — all available in English (only the demand map explorer is currently Turkish).
